DARYL CECILE

An ambitious, curious, and challenge-driven developer from Mauritus (an island off the coast of Madagascar)

I am driven by opportunities of innovation, knowledge sharing and documentation, and have a passion for providing the best user experience.

My interests consists of a mix of front-end design, frameworks like Next.js, developer tooling, and cloud infrastructure.

Experience

CapitalOne UK   Software Engineer   May '21 - Now

Working in a developer-tooling team; creating infrastructure, internal developer tools, and sharing knowledge of AWS Cloud solutions. This role covers some DevRel and developer advocacy work through encouragement and support of migrations to AWS Cloud services from on-prem.

Additionally working on tooling to simplify developer experience, and providing dev resources when capacity allows; all while providing training where required, and ensuring developers are onboarded in an industry-compliant way.

When not assisting with migration and CICD pipeline work, I work on tools ranging from package-management, chrome extension, dev-env automation, and more.

Distinction Ltd   Software Engineer   Jun '20 - Jul '21

Worked with clients across a wide range of domains, to create, maintain, and migrate their websites . As a software engineer at Distinction, I work mostly with Kentico CMS, C# (with .NET Framework), NodeJS, as well as the front-end technology stacks.

I contributed towards the creation and release of a major client website, worked with clients to resolve is sues and implement changes that lead to more efficient and stable products, and initiated process changes based on recommendations I made to simplify development and enable cost- saving. During my time at Distinction, I continue to upskill in Kentico, Pantheon, and Umbraco CMS.

ERT   Associate Software Developer   Aug '18 - Jul '19

I had the opportunity to work as part of the research and development team at ERT during a year-long placement where my duties included; feature design and implementation, as well as maintaining databases. Further to these, I was able to put my knowledge of JavaScript, C# and .NET to use in a larger scale product, while learning how to make these more efficient.

### ProjectFunction Ltd   Co-Founder/Educator   Jul '18 - Jul '21

Created opportunities for people to learn and get into the tech industry by providing free courses to those who are underrepresented in the field. As the primary developer, I developed and maintained both the product website and the learning hub, which were originally in PHP, but later migrated to Next.js. This role also involved working with industry partners and sponsors, to negotiate and form collaborations.

Code-First:Girls   Coding Coach   Mar - Jun '16

Worked as a team to provide coding assistance and mentorship to students aged 17+ with JavaScript, PHP, CSS, and HTML. Assisted students in acquiring skills to write efficient code, as well as providing implementation methods for their individual project ideas. In some cases, the individual has gone away to launch their startups, based on the ideas and guidance.
Education

BSc Computer Science   Nottingham Trent University

Was enroled into:

- Programming Fundamentals
- Internet Applications Programming
- Practical Project Management and Professional Development
- Information and Database Engineering
- Mobile Application Development

Competencies

SCSS Next.js TypeScript
React SQL French Python
NodeJS PHP C# .NET
Spanish SH AWS*
